## 2. Definition, concepts, and classifications

### 2.a. Definition and concepts

---

#### **Definition:**

The proportion of members and voting rights of developing countries in international organizations has two components, the developing country proportion of voting rights and the developing country proportion of membership in international organisations. In some institutions these two components are identical.

#### **Concepts:**

The indicator is calculated independently for eleven different international institutions: The United Nations General Assembly, the United Nations Security Council, the United Nations Economic and Social Council, the International Monetary Fund, the International Bank for Reconstruction and Development, the International Finance Corporation, the African Development Bank, the Asian Development Bank, the Inter-American Development Bank, the World Trade Organisation, and the Financial Stability Board.

There is no established convention for the designation of "developed" and "developing" countries or areas in the United Nations system. In common practice, Japan in Asia, Canada and the United States in northern America, Australia and New Zealand in Oceania, and Europe are considered "developed" regions or areas. The aggregation across all institutions is currently done according to the United Nations M.49 statistical standard which includes designation of "developed regions" and "developing regions", while an ongoing review seeks to reach agreement on how to define these terms for the purposes of SDG monitoring. The designations "developed" and "developing" are intended for statistical convenience and do not necessarily express a judgement about the stage reached by a particular country or area in the development process.

## 2.b. Unit of measure

---

Proportion of membership or voting rights.

## 2.c. Classifications

---

# 3. Data source type and data collection method

## 3.a. Data sources

---

### **Description:**

Annual reports, as presented on the website of the institution in question, are used as sources of data.

Sources of information by institution:

United Nations General Assembly:  
website of the General Assembly

United Nations Security Council:  
Report of the Security Council for the respective year

United Nations Economic and Social Council:  
Report of the Economic and Social Council for the respective year

### 3.e. Data providers

---

**Name:**

UNGA, UNSC, ECOSOC, IMF, IBRD, IFC, AfDB, ADB, IADB, WTO, FSB

**Description:**

The United Nations General Assembly, the United Nations Security Council, the United Nations Economic and Social Council, the International Monetary Fund, the International Bank for Reconstruction and Development, the International Finance Corporation, the African Development Bank, the Asian Development Bank, the Inter-American Development Bank, the World Trade Organisation, and the Financial Stability Board.

### 3.f. Data compilers

---

**Name:**

FFD/UN-DESA

**Description:**

The data is compiled and the proportions calculated by the Financing for Sustainable Development Office, United Nations Department of Economic and Social Affairs.

### 3.g. Institutional mandate

---

## 4. Other methodological considerations

### 4.a. Rationale

---

The United Nations is based on a principle of sovereign equality of all its Member States (Article 2, UN Charter). This indicator aims to measure the degree to which States enjoy equal representation in different international organizations.

### 4.b. Comment and limitations

---

Cross institutional comparisons need to pay attention to the different membership of the institutions. Voting rights and membership in their institutions are agreed by the Member States themselves. As a structural indicator, there will be only small changes over time to reflect agreement on new States joining as Members, suspension of voting rights, membership withdrawal and negotiated voting rights changes.

### 4.c. Method of computation

---

The computation uses each institutions' own published membership and voting rights data from their respective annual reports. The proportion of voting rights is computed as the number of voting rights allocated to developing countries, divided by the total number of voting rights. The proportion of membership is calculated by taking the number of developing country members, divided by the total number of members.

### 4.d. Validation

---

N/A

### 4.e. Adjustments

---

N/A

### 4.f. Treatment of missing values (i) at country level and (ii) at regional level

---

N/A

### 4.g. Regional aggregations

---

Aggregations are additive, with no weighting.

### 4.h. Methods and guidance available to countries for the compilation of the data at the national level

---

N/A

### 4.i. Quality management

---

Internal review.

#### 4.j Quality assurance

---

#### 4.k Quality assessment

---

### 5. Data availability and disaggregation

---

**Data availability:**

Available for all countries.

**Time series:**

2000, 2005, 2010, 2015, and annually thereafter

**Disaggregation:**

Data is calculated and presented separately for each international organization.

### 6. Comparability / deviation from international standards

---

N/A
